

Dreamland Safari Tours | Epic Desert Experiences

Astro Photography

A Gear List — courtesy of Cody York

Mandatory Camera Gear

- DSLR Camera that shoots at ISO 3200 or higher for Milky Way photos
- Tripod
- PhotoPills App

Recommended Camera Gear

- Fast, wide angle lenses of at least f2.8 for nighttime photography
- Sturdy Tripod
- Headlamp with red light (for seeing at night time to not disrupt your eyes)
- Shutter release cable/Intervolometer (if not built into camera)
- Lens Dew Heater or hand warmers and rubber band to wrap around lens (for condensation that can build on the lens at night if the temp is close to the dew point)

Mandatory Gear for Editing

- Laptop
- Memory card reader
- Lightroom CC Classic (Version 8.0 or newer)
- Photoshop (Version CS6 or higher, Creative Cloud version recommended)
- [Starry Landscape Stacker](#) (For star stacking, Mac users)
- [Sequator](#) (For star stacking, PC users)

Recommended Gear for Editing Session

- [Pro Panel](#) – (Recommended for Luminosity Masking)
- [Wacom Tablet](#)
